## EXPERIENCE

### • Kongsberg Digital India

May 2023 – July 2023

SDE Intern

Bengaluru

- It was a two-month-long summer internship at Digital Energy(KDI).
- I generalized and implemented a model for the existing project of the company to reduce the man work and redundancy.

## PROJECTS

### • Maven - A Freelancing Web Application

October 2023

ReactJS, NodeJS, ExpressJS, MongoDB

- Developed a web application where you can sell or buy Freelance services and Products.
- User authentication for buyer and seller using JWT.
- Seamless interaction between buyer and seller through the messaging application service.
- Payment Gateway with the help of Stripe.

### • Regex Pattern Generator

July 2023

HTML, CSS, Python, MongoDB, VS Code

- Prepared a model to generate the common regex pattern from the data to reduce the redundancy, time and men-work for every plant.
- I develop the model which will generate the regex pattern from the documents shared by the client.

### • Inci-Social Network Application

January 2023

React, NodeJS, MySQL

- Completed a full-stack web application using node and mysql database.
- This is the Social media App using the React framework. Where you can create new posts, see stories, see comments and create new comments and it's functionality work just like the Instagram and Facebook social apps.
